## Summary

I am a Junior Software Developer with a bachelor's degree in Computer Engineering from Akdeniz University. I have been part of software development teams that follow the Agile methodology. Throughout my education, teamwork was highly emphasized, and I have gained experience as a team leader in various term projects. I completed all my internships as a web developer and am open to exploring different fields within computer science. Continuous learning and growth in this field are essential to me. Currently, I am focusing on React and JavaScript to further enhance my skills.

## Education

Akdeniz University | Computer Engineering | 2017-2023 (1 Year Preparation Class)

## Experiences

**Software Developer** | [SaraglobalAI](#) | Izmir | September 2025 - Present | Remote

Architected and developed an enterprise-grade AI-powered CRM platform, serving as full-stack developer responsible for end-to-end implementation from database design to user interface..

**Frontend Developer** | [teknoved](#) | Antalya | July 2023 - October 2023 | On-Site

I had the opportunity to work alongside the team on the company's projects. This experience allowed me to enhance my skills in React, JavaScript, and TypeScript. I gained valuable experience working with a team and understanding how to manage a project effectively. Additionally, I acquired experience in backend development using the company's product, Spica Engine.

**Frontend Developer** | [PenDigital](#) | Izmir | July 2022 - September 2022 | Remote

During this period, I primarily worked on individual projects, which provided me with the opportunity to strengthen my knowledge of web development and WordPress-based website creation. I am providing an example of one of the projects that I worked. <https://labiaplastyturkey.com/tr/>

**AI Model Trainer** | [Outlier](#) | Freelance | July 2024 – May 2025 | Remote

I have contributed to various tasks in the training of AI models, primarily focusing on software and mathematics across different domains.

## Projects

[Quizo](#) - React Quiz App | React | TailwindCss

Quizo is an engaging quiz application built using React and styled with Tailwind CSS. This application offers users a choice between two exciting categories: History and Science. Answer challenging questions and test your knowledge within a limited time frame!

[Ticketo](#) - Schiphol Airport Reservation System | MongoDB | Express | React | Node.js

A MERN stack clone of the Schiphol Airport Reservation System, fetching real-time data from the Schiphol API. Project connects to MongoDB database. Allow user to reserve new flights and see past flights of users.

## Languages

Turkish: Native proficiency – mother tongue English: Full professional proficiency

## Hobbies

Camping - Hiking, Trekking & Mountaineering - Playing Guitar - Basketball
